

Plenty to put a Spring in your Step

Are you ready to come out from under the blanket yet? Winter was a long time coming but when it did, it arrived with a bang, drying out our skin and chilling us to the bone. With the days getting longer we can see the light at the end of the tunnel. It will be a while yet till we are taking off our layers to be summer ready. Our to-do checklist includes IPL hair removal, red vein treatments and skin rejuvenation. Start now to be hair free by summer – change your life with IPL. Winter is the best time to start a series of IPL to sort out those nagging worries that took the fun out of last summer – like hairy bikini line, underarms or legs. Our IPL machine is the best quality available—Quantum HR/SR—the #1 in the world for effectiveness and safety and is the choice of Professionals. IPL and other light treatments are best done during winter when you're not exposing your skin to the sun, so start now to look the best you ever have this summer! Look years younger—At the Speed of Light! Most of us don't want to look like we're 18 again—we just wish our skin looked as fresh as it did a few years ago. Now Images Medispa can make your wishes come true for less than \$1000, and without resorting to the surgeon's knife. No downtime, no injectables. We strongly recommend an annual course of treatments to keep your skin looking healthy and this month and next we're offering two great specials that will give your skin a burst of energy for spring. If you've tested the water with just one treatment, imagine what's possible with a targeted course. Choose from 2 different methods depending on what your skin needs. Ask your therapist which course is best for you!

JOCELYN NIXON
Beauty Specialist,
Owner of Images

What we do daily! Let me tell you a story...

Our Therapist Monica has successfully treated and cleared numerous facial skin carcinomas and scaly patches for Mrs. X—her Doctor checked and removed frequently. Mrs. X has never used sun block as she didn't believe there was any point, her face was red and irritated. Monica suggested a course of 9 Omnilux Light treatments as it was developed by Doctors to treat skin and grow new collagen. After the first treatment Mrs. X noticed her skin was more hydrated & softer. After the second light a week later the rest of the carcinoma scaly lumps were starting to heal and dry flakey skin was reduced. After the third light, all the dry patches had disappeared! To read more go to our website www.imagesmedispa.co.nz
