

# Hair Loss

## NO LONGER A PROBLEM

### Hair Loss and Hair Growth Disorders

An increase in hair loss can be caused by many factors: stress, illness, poor nutrition, hormonal fluctuations or genetic predisposition. Whatever the cause, a serious weakening of hair roots is the result. The active growth phase is cut short - hair is shed prematurely.

### The Solution:

With its unique METHODE REGENERANTE care concept, LA BIOSTHETIQUE provides everything your hair needs for improved growth, a positive energy boost and optimum support.

- The growth impulse is heightened
- The energy level of cells is increased
- The hair's active growth phase is positively influenced
- The hair roots' supply of nutrients is improved

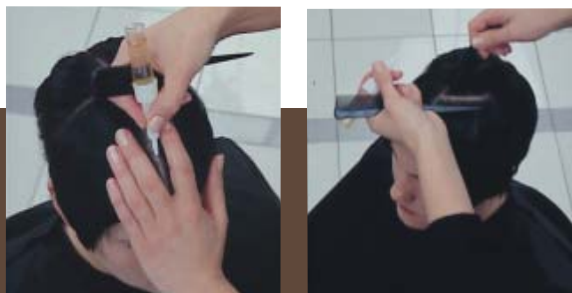

### Scientifically Proven Effect

The success of METHODE REGENERANTE is based on the innovative Complexe Regenerant formula, which redresses the ratio between dead hair and actively growing hair by over 100%\* in favour of the growing hair.

### METHODE REGENERANTE BIO-FANELAN REGENERANT
