

A TOTAL COMMITMENT TO QUALITY & SERVICE

DW Homes was founded on the principle of a focused customer service and delivery of an exceptionally high quality product and service. Nothing is compromised even to the smallest bolt and detail. We have a team of home consultants and architectural designers who will be your main point of contact throughout your building process to ensure that you are communicated with thoroughly about the progress of building your new home.

We build houses throughout New Zealand, from Cape Reinga to Stewart Island, nothing is out of reach for us. The word 'No' does not exist in our vocabulary. If you have a desire or want, we can build it for you. We do not believe in restricting our business to the conventional terms of the building industry, as we understand that building a house is one of the biggest investments you will undertake. For this reason, you are assured of our utmost care and respect. This is our promise and this is a guarantee of our service level.

At DW Homes we believe in homes that reflect your style and suit your personality, because we don't just build homes, we build dreams...

Whether it is your first home or adding to your investment portfolio, building a new home need not be a daunting task.

Our award-winning homes speak volumes about our design innovation, quality of product and workmanship and future proofing building techniques. We differentiate ourselves by providing you with a service that is both first in class and personal from every angle of your project. It does not end there — continued after-sales service excellence is something we take pride in, and measure ourselves on, because we do not believe our relationship with you ends when we hand you the keys to your new home.

We also offer you the peace of mind of a 10-year Master Builders guarantee, and we go the extra step by offering you our 12 Month Maintenance Free policy. You will know that from the day you are handed the keys to your home, it will be perfectly completed.
